INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/IB 03/05673

I. Basis	of the	report
----------	--------	--------

1.	the	With regard to the elements of the international application (Replacement sheets which have been furnished to he receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):						
	Des	scription, Pages	·					
	1-9		as originally filed					
	Cla	ims, Numbers						
	1-1	4	received on 03.12.2004 with letter of 02.12.2004					
2.		th regard to the language , all the elements marked above were available or furnished to this Authority in the aguage in which the international application was filed, unless otherwise indicated under this item.						
	The	ese elements were av	vailable or furnished to this Authority in the following language: , which is:					
		the language of a tra	anslation furnished for the purposes of the international search (under Rule 23.1(b)).					
		the language of pub	olication of the international application (under Rule 48.3(b)).					
		the language of a translation Rule 55.2 and/or 55.	anslation furnished for the purposes of international preliminary examination (under .3).					
3.	Witl inte	h regard to any nucle rnational preliminary	eotide and/or amino acid sequence disclosed in the international application, the examination was carried out on the basis of the sequence listing:					
		contained in the inte	ernational application in written form.					
		filed together with th	ne international application in computer readable form.					
		furnished subseque	ntly to this Authority in written form.					
		furnished subsequently to this Authority in computer readable form.						
		The statement that t in the international a	the subsequently furnished written sequence listing does not go beyond the disclosure application as filed has been furnished.					
		The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.						
4.	The	amendments have r	resulted in the cancellation of:					
		the description,	pages:					
		the claims,	Nos.:					
		the drawings,	sheets:					
5.			n established as if (some of) the amendments had not been made, since they have go beyond the disclosure as filed (Rule 70.2(c)).					
		(Any replacement sl report.)	heet containing such amendments must be referred to under item 1 and annexed to this					

6. Additional observations, if necessary:

- V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- 1. Statement

Novelty (N) Yes: Claims 1-14

No: Claims

Inventive step (IS) Yes: Claims 1-14

No: Claims

Industrial applicability (IA) Yes: Claims 1-14

No: Claims

2. Citations and explanations

see separate sheet

- 1). Claim 1 as presently on file, concerns the use of extract of animal/plant/microbial origin comprising docosahexaenoic acid (DHA) for the treatment of lipodystrophy in a mammal, said medicament being administered to a patient who is concomitantly receiving a highly active anti-retroviral therapy (HAART).
- 1a) The amendments carried out to claim 1 find basis in the originally filed application (cf. page 5, lines 14-31) and therefore meet the requirements of Art. 34(2)(b) of the PCT.
- 2a) As to the definition of "lipodystrophy", according to the definitions in page 2, lines 8-18, this term encompasses a multifactorial illness wherein not only the metabolism of fatty acids is involved, but also the metabolism of glucids, etc.. This is evident from the the scientific documents denoted as enclosures 1 and 2 provided by the Applicant in his letter of reply.
- 2b) On the other hand, the problem to be solved lies in the provision of a treatment of lipodistrophy whithout toxic side effects caused to HIV infected patients having developed lipodistrophy during their HAART treatment.
- 2c) As such, the cited prior art documents will be reconsidered with respect to the subject-matter of the present application:
- D1, Prostaglandins, Leukotrienes and Essential Fatty Acids, 37(2), aug. 1989, pp. 135-137, Bégin M.E. et al., report that polyunsaturated fatty acids (PUFA) modulate the immune system and inactivate viruses in-vitro. Moreover, D1 stresses the reduced levels on C20 and C22 essential fatty acids including DHA in a significant and selective way in patients infected with the aids virus (cf. abstract, page 136, 2nd para., page 137, table 4, and 2nd para. on the left-sided col.). The supplemental addition of n-3 PUFA (implitly including DHA) as nutritional support is strongly recommended in D1 (cf. page 137, 2nd col.).
- D2, FR-A-2 749 133, provides **nutritional supplements containing DHA** for improving lipid metabolism in aids patients (cf. abstract, page 1, lines 5-15, page 13, lines 34-40, claim 11).

- D3, DE-A-40 17 979, provides a lipid mixture used as medicine and for **dietary nutrition**, containing DHA for treating diseases associated with lipid coated viruses with particular reference to HIV-1 infections (cf. abstract, examples 1-3).
- D4, EP-A-378 824, discloses the use of omega-3-fatty acids in the treatment of patients suffering from cachexia caused by tumors or due to aids infection (cf. abstract, page 2, 1st para., claims 1-3).
- 3). As none of the documents cited above discloses or even suggests the use of DHA in the treatment of lipodystrophy in a patient receiving concomitantly a high active antiretroviral therapy (HAART), the use as presently intended has to be acknowledge both novel and inventive pursuant to Arts. 33(2) and 33(3) of the PCT.

OFICINA PONTI

ENCLOSURT-1

JC20 Rec'd PCT/PTO 17 MAY 2005

10

CLAIMS

- CADE (said medicament being administered to a patient who is consomitantly receiving a highly active anti-retroviral therapy (HAAAT))
 - Use of an extract of animal, plant 5 microorganism-produced origin that comprises docosahexaenoic acid as active substance for manufacture of medicament for the treatment lipodystrophy in a mammal () The transfer of a contract the contract of the
 - 2. Use according to Claim 1, characterised in that 10 the amount of docosahexaenoic acid in said extract is higher than or equal to 100 mg/day.
 - 3. Use according to Claim 2, characterised in that said amount of docosahexaenoic acid in said extract is 4 grams/day.
 - 4. Use according to any of claims 1 to 3, in which 15 the medicament promotes adipocytary differentiation.
 - 5. Use according to any of claims 1 to 3, in which the medicament has hypolipemiant activity.
 - 6. Use according to any of claims 1 to 3, in which 20 the medicament reduces the alpha tumour necrosis factor.
 - 7. Use according to any of claims 1 to 3, in which the medicament has antihypertensive activity.
 - 8. Use according to claim 1, medicament is capable of inhibiting the toxic effects 25 caused by the administration of an antiretroviral drug.
 - 9. Use according to Claim 1, in which said docosahexaenoic acid is present in said extract in a concentration which ranges between 5% and 100% (w/w).
 - 10. Use according to Claim 9, in which said 30 docosahexaenoic acid is present in said extract in a concentration which ranges between 50% and 100% (w/w).
 - 11. Use according to any of the preceding claims, in which the medicament is administered orally.
 - 12. Use according to any of the preceding claims, 35 in which the drug is administered parenterally.

11

- 13. Use according to Claim 1, in which said mammal is a human.
- 14. Use according to Claim 13, in which said human is infected with the HIV virus.

Applicant

PROYECTO EMPRESARIAL BRUDY, S.L.

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.
